

City Superintendent's Report

4/1/24

Water

The changing river conditions have been providing our operators with a challenge to treat water within the 8-hour day normally expected this time of year. They have had some long days but have kept us in water and are doing an excellent job.

Sewer

The crew at the wastewater treatment plant are still working on the broken clarifier and hope to have it repaired soon.

Streets

Two employees attended training last week on the streets and Danny Dezort received his road scholarship certification. The certification took several years of training and is quite an accomplishment.

Solid Waste

Clean up days are scheduled for the week of May 20th as always.
